

Adaptation Shark Tank: Collaborative Project Conceptualization

Thursday, August 19th, 9:00 - 11:00 AM

<https://lgc.zoom.us/j/4013754773>

At this highly interactive workshop, participants will work collaboratively to develop then pitch an adaptation project concept that addresses key implementation challenges identified in the track's first workshop. Each group will focus on a distinct climate impact and community type, respond to curveball scenarios, and engage in a role playing exercise. We hope you can join us!

9:00 | Welcome

- Welcoming Remarks, Group Norms, and Track Vision Statement
- Workshop Agenda and Objectives

9:10 | Project Concept Development

Participants will work in small groups to develop a high-level project concept that addresses a primary climate impact for a specified community type, exploring strategies for developing partnerships, engaging communities, funding and financing, evaluation, and more.

- **Extreme Heat:** Progressive urban community that is highly diverse in terms of race and ethnicity, languages spoken, and socioeconomic status with a large houseless population.
- **Drought:** Politically diverse county with a mix of urban, suburban, and rural communities, a highly active and engaged CBO network, the largest agriculture sector in the state.
- **Wildfire:** Rural community with many Tribes and Native communities, a tourism-based economy, and an older, lower-income population with limited access to data and service.
- **Sea Level Rise:** Highly developed coastal community with beaches providing recreational value and a service-driven economy supported by a large undocumented population.

10:00 | Stretch Break

10:05 | Project Concept Refinement

Participants will continue working in small groups to refine their project concept, responding to a curveball scenario and engaging in a role playing exercise.

10:40 | Project Pitch

Each group will have 3-4 minutes to pitch their project concept.

10:55 | Closing Remarks

11:00 | Adjourn
