Room 1: San Gabriel Valley Wildfire Risk Reduction Buffer Zones

Financing the creation of wildfire risk buffer zones with fire access roads

Maybe go for a planning grant that includes community outreach and scoping.

Development of smaller pilot projects to test out different strategies

Insurance cost saving or eligibility can justify the cost of buffers if wildfires are priced by insurance companies. I think the Department of Insurance has a workgroup on this topic.

> Scientists. insurance companies. communities all at the table

Potential rezoning of land from residential to agricultural

Lot of expertise in help (i.e., Rancho

Enlist the California Conservation Corps

Public/private partnerships to maintain buffer zones

Case studies from other regions

Depending on type of buffer implemented. make local partnerships for maintenance/steward

Ag land could be good buffer and partnership

the area that could Santa Ana Botanical Garden, Los Angeles Conservation Corps) Community concerns and ecosystem concerns

Homeowners are losing insurance

areas (good thing) / but some neighborhoods not happy because densifying neighborhoods

SB 9 bill, lot splits,

housing increase in not high fire risk

Some of the buffer projects like golf courses or parks can increase the property values in the neighborhood, which may incentive them to support the project.

There is a concern for future housing needs and the demand for future development

Mudslide problems and potential for stormwater recharge

Potential pushback from environmental organizations if installing a barrier such as a golf course, park, etc.

Different type of fires (wind-driven fires coming from North (Santa Anas) a big concern)

Fire fighting staging areas

Develop/prioritize any research needs and partner with nearby academic universities.

Room 2: Flooding in Delta Agricultural Lands from SLR and Subsidence

Multiple players with varying jurisdictions and objectives Work closely Goal is to get with local alignment, jurisdictions share on adaptation resources solutions Regional Use regional entities to entity to fund govern adaptation adaptation Regional entities to fund Sediment Mgmt adaptation at Master Plan local level. example of bringing lots of agencies together Adaptation Pathways MOUs and letters of planning support to help carrots/incentives solidify multi-agency technique commitments of resources, funds, roles/responsibilities.

Political will and public support

Fine balance b/n scaring and educating for CC

Who will get the benefits?

Massive educational

campaign/outreach.

Make them scared!

Paris Hilton's family

the Delta. Enlist her

owns an island in

support.

to get
public buy in, you
need to connect
how flooding or
other climate
change impacts can
affect their daily
lives.

The growing climate crisis

Present "inaction" outcomes

CC Doesn't respect jurist. boundaries

Build conveyance facility around Delta?

Public education

Delta Stewardship Council: Delta Adapts (Vulnerability Assessment) March

> Will our time and efforts meet the crisis?

Room 3: RYSE Center Community Resilience Hub

Community-based decision making processes

County government and elected support

Health and wellness services? APEN is an NGO - where is the city on this?

Do Richmond or County have sustainability, resilience or climate action plans?

assess the different needs for routine operations vs "emergency" - in particular duration of potential emergency outages; stand alone period (24 hrs? 96 hrs?) vs operating with outside resources available?

creating paid part-time community leadership roles

leadership pathway program for local high schools

> Programming the building to be responive to emergency, social and other services

plan for critical energy needs that can be met by on-site solar & storage, and strategy to cut other activities if needed to support extended energy cuts

Authentic partnerships in fundraising & implementation

Foundations that fund the stuff in column 1

ls

GRID alternatives and Richmond **BUILD**

DTSC **ECRG** coming soon

What are existing

response plans for

disasters, and how

integrate with those

Richmond

emergency

do other orgs

plans?

Chevron any help?

State government support?

Seems like there are a lot of "extended" social services reach out to those departments serving the types of programs RYSE provides

Look out for recently approved funds from governor

Richmond Community Foundation

Political impact and leadership opportunities

ls Chevron any help?

Channeling youth energy and unfiltered ideas

Hosting politicians or community leaders for open discussion between them and the community

Get from ad-hoc to proactive in all levels of emergency and support services
